Cambiar imágenes: Mostrar videos: High-resolution full-color display apparatus, such as LCD (Liquid Crystal Display), LDC (Liquid Crystal Diode Display), EL (Electroluminescence), and PDP (Plasma Display Panel), have been widely used as display apparatus for displaying images. Here, the full-color display apparatus (referred to simply as a display apparatus hereinafter) is a display apparatus capable of simultaneously displaying images of three primary colors, i.e., red (R), green (G), and blue (B) in a display panel. In addition, the display apparatus is a display apparatus capable of displaying images with higher brightness. Recently, there has been an increasing demand for a display apparatus that simultaneously displays an image of high brightness and an image of high color purity and high color reproducibility. In order to simultaneously display images of high brightness and high color purity and high color reproducibility, i.e., images of a high resolution, and also simultaneously displaying images of high color purity and high color reproducibility, i.e., images of a high dynamic range, it is necessary to increase the size of pixels included in the display panel. However, if the size of the pixels is
