The app lets users add a customized macro to the open file menu. Keyboard shortcuts are great, but after a while, it can get a bit tiresome to have to press many keys to open the file menu. To alleviate the issue, NanaZip Activation Code introduces the Keymacro feature that allows users to add custom file and folders to the open file menu. Create a new folder with a keyboard shortcut To create a custom keyboard shortcut, NanaZip requires users to simply add a line of code to the app's registry file. Having said that, you may also be wondering how exactly to code that. Don't worry, all you need to do is place the commands in an ordered manner as shown in the screenshot below. Creating a new keyboard shortcut on the desktop Let's assume that we want to create a shortcut for the desktop. To do so, we'll add a line of code to the registry file located at HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\NanaApps\NanaKey\DesktopShortcut. Creating a new keyboard shortcut for the desktop Next, we have to define the exact path where the shortcut will reside, so we need to add our shortcut to the registry key by replacing the existing line with the following:

```
[HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\NanaApps\NanaKey\DesktopShortcut]
```

```
"ImagePath"="%APPDATA%\NanaApps\NanaKey ana.ico" "Description"="This is the shortcut for your desktop" Now that we've created the custom keyboard shortcut, users need to reboot the computer to see the change in effect. However, this is not a necessary step. Once the app has been restarted, users can start typing the shortcut and the resulting path will appear in the left pane. Add a new shortcut to the file menu To add a new keyboard shortcut to the open file menu, users need to modify the aforementioned registry line. This time, however, we'll add a new line for the command key and place it directly underneath the existing line. The complete registry line is the one below.
```

```
[HKEY_LOCAL_MACHINE\SOFTWARE\Wow6432Node\NanaApps\NanaKey\NanaFileMenu]
```

```
"ImagePath"="%APPDATA%\NanaApps\NanaKey 1d6a3396d6
```

What's New In?

Syncting is a cross-platform, peer-to-peer file synchronization and access tool that can be used on both Windows and Mac. The application is still in the early stages of development, but offers a whole lot of features that make it worthwhile. Syncting: Great for cross-platform connectivity Being a peer-to-peer tool, Syncting can be used to connect multiple computers to a central server where files can be shared and synchronized with others. Moreover, the developer also enables users to keep local copies of the files on their machines. Although the tool is primarily used to keep files in sync, it can also be used to distribute files from one person to another. Another unique feature that the app has is its ability to verify the file and data integrity. In terms of functionality, the tool comes with a decent set of features and tools that will enable you to manage your files, keep them in sync and keep your data protected. For instance, you can add multiple synchronisation and backup rules to keep the files you want to keep up to date. Restart the explorer to add the app to the context menu If you are looking for a way to keep multiple devices in sync without being stuck with a cloud service, Syncting is a good choice. The app is available for both Windows and Mac. Description: Yandex Browser is the official browser of the Russian search engine, Yandex. The application works on both Windows and Mac and is compatible with a variety of operating systems. Yandex Browser: Another file manager As the name suggests, Yandex Browser can be used to browse files and websites. However, the app also comes with a file manager that enables you to easily manage your files and access the tools that you need, with one simple interface. The app also provides you with a bookmark manager where you can easily bookmark any website, thus saving your time and efforts. Aside from being a file manager, the application is also a browser. To access the features of this, you need to connect to a Yandex account, and once connected, you can access your favourite web sites and websites. In the eventuality that you are looking for a file explorer and browser that works great on both Windows and Mac, and also works on both Google Chrome and Safari, then perhaps you can consider giving Yandex Browser a go. Description: WhatsApp is a messaging app that helps people to stay connected with their friends and family. While the service has over 1.5 billion active users, it is the most popular messaging app on both Android and iOS platforms. The app is still in its early stages of development, but offers a whole lot of features that make it a worthwhile tool. WhatsApp: Helping you to stay in touch The app is available for both Windows and Mac. As mentioned earlier, the messaging app can be used to keep
