Sagelight Cinepan Player is a fun and appealing piece of software whose main purpose is to display moving panoramic pictures on your desktop, enabling you to look at them whenever you are not using your computer. Straightforward and intuitive usage

Subsequent to the uneventful installation process, you will need to launch the application using your administrator privileges, otherwise there is the possibility that Sagelight Cinepan Player will encounter an error and shutdown. The panoramic image that you selected will begin rotate, slowly moving backwards or forwards to reveal the whole scenery, while also hiding anything you might want to keep private on your desktop. Display a panoramic screensaver on your desktop Sagelight Cinepan Player comes with six built-in panoramas, but also allows you to load your files, to show them as part of the screensaver. Similarly, you can obtain additional pictures from several online sources. However, in order to work with your own images, you need to launch the program in development mode, load the file you wish to show, then configure its angle, horizon, full screen exaggeration and quality. As a general rule, the tool lets you set the preferred play speed on all file ('Slow', 'Fast', 'Default'), the 'Background Motif' ('Blue Aura', 'Gray Texture', 'Stone' or others), the display format (widescreen, fullscreen or random), the CPU mode and the panorama sharpness. Moreover, Sagelight Cinepan Player lets you use 'Soft Light' or 'Cinema Mode', depending on your individual preference. A handy panorama viewer To conclude, Sagelight Cinepan Player is an interesting screensaver that aims to offer you the ability of displaying rotating panoramas on your desktop, giving you the illusion of being in a cinema.
